the results. The lease does not include oil or gas pipelines that might release petroleum products into the environment, however surveys are required to verify that the cables remain buried and are not a threat to commercial and recreational fishing. The 2010 survey of this line did not show any exposed cables.

4. On November 12, 2015, the Lessee delivered the required 2-year advance notification to Commission staff of its intent to terminate the lease on November 9, 2017, and an application to terminate the lease has been received. Staff is reviewing alternatives for the removal and restoration of the lease premises. Staff will return to the Commission at a later date with a recommendation for the final disposition of the cable along with a full analysis under the California Environmental Quality Act (CEQA).
5. This proposed action is consistent with Strategy 2.1 of the Commission's Strategic Plan to optimize returns for the responsible development and use of State lands and resources, both onshore and offshore.
6. Approving the revision of rent is not a project as defined by CEQA because it is an administrative action that will not result in direct or indirect physical changes in the environment.
